The University Summer School

WOULD YOU like to continue your studies this summer under the direction of a competent Faculty and with the advantage of a good library and well equipped laboratories? Would you like to spend six weeks in one of the most beautiful and progressive cities of the West, located in the very heart of the mountains, and possessing one of the most delightful summer climates in the world?

Would you like to secure these advantages with the least expenditure of money and with the greatest convenience to yourself?

If you would like these things, come to the Summer School of the University of Montana, in Missoula, June 9th to July 18th, 1913.

The Summer School is intended for Teachers who wish to improve their professional equipment. To do residence work for credits toward degrees. To increase their knowledge and renew their enthusiasm.

Undergraduates who wish to shorten their university course by using the Summer School to complete the four years' course of the University in three and one-half years. To broaden the field of their studies. To meet the requirements of University Certificates of Qualification to Teach. To overcome handicaps of preparation and entrance conditions.

High School Students who wish to complete a high school course, already almost finished.

Correspondence Students who wish to do some work in residence.

Any person who wishes to spend vacation weeks in intellectual acquisition.

SNOW-CAPPED MOUNTAINS

Courses

Biology, Botany (Flathead Lake Station), Chemistry, Domestic Science, Economics, Education, English, Fine Arts, History, Home Decoration and Household Art, Latin, Library Science, Literature, Manual Training and Shop Work, Mathematics, Mechanical Drawing, Modern Languages, Music, Psychology, Physics, Physical Training, Playgrounds and Supervised Play, Surveying. GEOLOGY

Weekly concerts at the University by the Department of Music will add greatly to the pleasure of the season.

A full announcement of the work of the Summer School will be issued about April 18.

Natural Environment of Missoula

MISSOULA is beautifully located in one of the most picturesque valleys of western Montana. In all directions high mountains rise, clothed with evergreen forests, through which cold, clear mountain streams rush to join the Hell Gate, the Blackfoot and the Bitter Root rivers. Missoula is near the junction of these streams at the mouth of the famous Hell Gate canyon, storied in Indian tradition and the early annals of discovery and immigration. A plain extends westward to where the land rises to the foot hills of the Bitter Root range, with the high summits of St. Mary's and Lolo on the skyline. Missoula is fifty miles as the crow flies, due west of the continental divide at the head of the Blackfoot river. Flathead Lake lies forty miles to the north, and southward it is fifty or sixty to the Como peaks and lakes, both regions easily accessible, and of surpassing interest to the summer tourist.

Surrounded thus by a country rich in its natural attractiveness, Missoula offers many opportunities for local excursions, and these will be made a special feature of the sessions of the summer school. Week-end trips will be arranged, which, at very slight expense, will furnish delightful recreation out of doors at the most attractive season of the year.

It is about an hour's ride from Missoula to the Flathead Reservation,

THE LIBRARY

where are the Buffalo Park, St. Ignatius Mission, and the Mission mountains. There is a grassy mountain valley near Arlee, a plain hemmed in by rugged mountains. Here for a few days every summer the landscape is dotted with tepees, and the remnants of the Selish tribes conduct their ancestral dances in full panoply. This is always an occasion of great interest to many in the opportunity it affords of seeing something of aboriginal life in Montana, and of becoming acquainted with some of the noted and picturesque characters of a well known race.

Southward, from Missoula, is the famous Bitter Root Valley, one of the most fertile and beautiful regions of Montana. It lies under the evening shadows of the Bitter Root range, which rises like a wall along the western border of the state. An auto ride of a few hours over splendid roads, past the rich fields and extensive orchards of prosperous country homes, always in near view of the majestic mountains, and often skirting the shore of the beautiful river which traverses this valley, is an exhilarating experience not soon to be forgotten. The Bitter Root Inn is delightfully situated, and a little rest and refreshment here is not the least of the pleasures of the trip. From this valley several other points are accessible. The Lolo Hot Springs are reached by a very enjoyable stage ride, and the ascent of Mt. Lolo, the most commanding eminence of the region, is well worth the effort.

The Rattlesnake canyon is a favorite resort for short trips from the city. Parties going by wagon may easily reach the falls and return the same day. The ride is delightful, the woods rich in flowers and the stream of great beauty and interest.

VIEW OF GREENOUGH PARK

Of Special Interest to Teachers

IN THE Department of Psychology and Education will be offered a rich variety of courses designed for those secondary and elementary teachers of Montana or other states, who desire to pursue work for professional advancement. The department is able to announce thus early the appointment of three of the leading specialists in method in this country: Miss Helen Herron of New Orleans; Miss Ida Vandergaw, method supervisor of the schools of Oakland, Cal., and Miss Alma Binzel, method specialist from the Winona, Wis., Normal School. The faculty of the department will be augmented by the addition of a number of eminent professors from other universities in the United States and England; and by special lecturers selected from a large list of persons who have attained great leadership in one or another field of education. The meeting of the N. E. A. at Salt Lake in July gives us unusual advantages for securing lecturers this season.

The department will attempt to arrange courses that are most desired by teachers and, with this in view, a circular letter has been sent to city and county superintendents and principals of high schools. The following courses can be announced at this time: General Psychology; Educational Psychology, History and Principles of Education, School Hygiene, Modern Educational Problems, Primary Grade Methods, Intermediate Grade Methods, Grammar Grade Methods, Recent Development in Rural Education, School Playgrounds and Playground Work, The Development of Household Arts in the School, Administration and Supervision of School Systems. In addition to these, the department will attempt to add any of the following courses according as there seems to be demand for them: Psychology of Abnormal and Defective Types, Secondary Education, Kindergarten Methods and Demonstration, Music in the Schools, The Development of Manual Arts in the School.

EXPENSES

REGISTRATION—A general registration fee of $10.00 will be charged for any or all courses.

ROOM AND BOARD—The University will undertake to provide accommodations (including room and board) at the rate of $30.00 for the six weeks' session, for all students who make application before May 15th, and who forward therewith a deposit of $5.00. The dormitory on the campus will be reserved for women. For further particulars, address the Secretary of the University. Students who wish to secure accommodations in private families may do so, making their own arrangements. Rooms may be had for from $6.00 to $12.00 per month. Such persons may secure board at the University dining hall at the rate of $4.50 per week, or for $24.00 for six weeks, if paid in advance.

TRAVEL—The authorities of the University wish to place the Summer School within the reach of all the teachers and students of Montana. In view of this, the cost of round trip railway fare (based on cheapest route and not including meals or sleeper) less $5.00 will be refunded to those persons regularly enrolled. This privilege cannot be extended to persons living outside of the state, who, however, may find it advantageous to buy tickets via Glacier Park or Yellowstone Park. Hence for Montana teachers and students it will be seen that the total expense of the Summer School need not exceed the following: Registration, $10.00; Board and Room for the session, $30.00; Railway fare, $5.00. TOTAL, $45.00.

Registration Day June 9; Instruction begins June 10; Instruction ends July 18. *For further information address, Director of the Summer School, University of Montana, Missoula*

The University Biological Station

THE Biological Station of the University will offer courses during June and July at the station grounds on the eastern shore of Flathead Lake. A two story brick building, on a beautiful and commanding site, in a rich and virgin field, makes possible work of every grade, from that of the beginner to that of the specialist. Full information will be given in a separate bulletin. Courses will be offered in Botany, Zoology, Photography and Nature Study. Special attention will be given to the work and needs of teachers. Every facility will be offered to advanced students and investigators.

The station owns eighty-seven acres of beautiful timber land, with nearly a mile and a half of shore line. The beautiful Mission mountains rise quite abruptly from the lake to Alpine heights. The scenery is wild, rugged and interesting. At the station, work and recreation may be combined so as to give the very best results for a summer outing.

For information, address Morton J. Elrod, Director Biological Station, Missoula, Montana.
